

CERTIFICATE OF COMMERCIAL COMPOSTABILITY

FOR COMPONENTS & INGREDIENTS

THIS IS TO CERTIFY that the following items have been found to comply with the specifications established by ASTM Standard(s) D6400, D6868 and the BPI Commercial Compostability Certification Scheme Version 2.5.2 in accordance with the terms and conditions of The International Biodegradable Products Institute, Inc. License Agreement & Certification Program for Compostable Products:

Uncolored Coated Paperboard, max usage 100%

This Certificate verifies that the certified items contain no intentionally-added organic fluorinated chemicals, such as per- and poly-fluorinated substances (PFAS), including as a processing aid. This has been confirmed through detailed analysis of the formulation and Safety Data Sheets for all ingredients, a signed manufacturer statement(s), and a screening test showing a maximum of 100 parts per million (ppm) total organic fluorine as a proxy for PFAS (unless demonstrated to be from naturally-occurring fluorine).

This Certificate authorizes the Licensee to use the BPI Certification Mark to support claims of commercial compostability for items in the following category or categories:

Components - Coated Boards

Only items with the specific stock keeping units (SKUs) or item numbers found on the attached product list and Met Kağıtçılık Sanayi ve Ticaret A.Ş. (MetPack)'s listing in BPI's online product catalog are covered under this Certificate:

Use of the BPI Certification Mark is subject to all conditions and terms of the License Agreement & Certification Program. This approval is for a Component/Ingredient only and cannot be used to make claims of commercial compostability for a finished product. Manufacturers and converters using these certified components/ingredients to manufacture other items must seek a separate BPI Certification in order to use the BPI Certification Mark or claim such certification on those items.
