PROFESSIONAL SUMMARY & CAREER OBJECTIVE

Qualified Chemical Engineering Technician (N4-N6, Vhembe TVET College) with a solid theoretical foundation in process operations, plant systems, and industrial safety, complemented by 12 years of proven workplace discipline in high-accuracy, high-volume administrative environments. Demonstrates strong competencies in numerical accuracy, process-driven reconciliation, attention to detail, and adherence to procedure - core strengths directly transferable to plant and process environments. Recognised for reliability, integrity, and the ability to perform consistently under pressure.

Career Objective: To secure an entry-level or trainee position as a Chemical Engineering Technician / Process Technician, where a strong technical grounding in Chemical Engineering (N4-N6) can be applied and developed further, contributing to safe, efficient, and quality-driven plant operations while growing into a skilled process engineering professional.
